A proposed model of JIT purchasing in an integrated steel plant
R.N. Roy and K.K. Guin 179
Disposal of excess stock at the end of a project when facing on-going operational usage
E.A. Silver and K.A. Willoughby 189
On the risk-based aggregate planning for seasonal products
J. Vörös 195
Inventory and capacity trade-offs in a manufacturing cell
S.F. Hurley and D.C. Whybark 203
The impact of real-time data communication on inventory management
A.C. Yao and J.G. Carlson 213
A simulation model for container-terminal operation analysis using an object-oriented approach
W.Y. Yun and Y.S. Choi 221

Mathematical Modelling of Inventories
Aggregate dynamics of (*S, s*) inventory management
D.S. Allen 231
A joint replenishment policy for multi-echelon inventory control
S. Axsäter and W.-F. Zhang 243
Production lot sizing with variable production rate and explicit idle capacity cost
S. Eiamkanchanalai and A. Banerjee 251
Inventory control on sequences of links with given transportation frequencies
L. Bertazzi and M.G. Speranza 261
Inventory allocation and customer travelling problem in spatial duopoly
M. Bogataj 271
A market game with the characteristic function according to the MRP and input–output analysis model
L. Horvat and L. Bogataj 281
Multi-level control and asymptotic behaviour of some inventory systems
E. Bulinskaya 289
A dynamic model for the single-vendor, multi-buyer problem
S. Bylka 297
Production planning using a hybrid simulation – analytical approach
M.D. Byrne and M.A. Bakir 305
Analysis of assembly systems with service level constraints
T.G. de Kok and J.W.C.H. Visschers 313
Computational results for the control of a divergent *N*-echelon inventory system
E.B. Diks and A.G. de Kok 327
Production strategies under environmental constraints in an Arrow–Karlin model
I. Dobos 337
Managing supply chain inventories: A multiple retailer, one warehouse, multiple supplier model
R. Ganeshan 341
Determining locations of stock points from a multi-criteria decision problem
G. Deweß and H.-J. Girlich 355
A net present value approach to safety stocks in a multi-level MRP system
R.W. Grubbström 361

Analysis of an inventory system under supply uncertainty
R. Güllü, E. Önol and N. Erkip 377
On the suboptimality of ($S-1$, S) lost sales inventory policies
R.M. Hill 387
A two-supplier inventory model
F. Janssen and T. de Kok 395
Lot sizing for varying degrees of demand uncertainty
S.G. Johansen 405
Segregating space allocation models for container inventories in port container terminals
K.H. Kim and H.B. Kim 415
A routing algorithm for a single straddle carrier to load export containers onto a containership
K.Y. Kim and K.H. Kim 425
Lead-time variability in a homogeneous queueing model of batching
R. Kuik and P.F.J. Tielemans 435
Supply chain modelling using fuzzy sets
D. Petrovic, R. Roy and R. Petrovic 443
On a forward algorithm for a generalized production inventory problem
R. Rempała 455
Analysis of the EOQ repair and waste disposal problem with integer setup numbers
K. Richter and I. Dobos 463
Lot sizes in a capacity constrained facility with available initial inventories
A. Segerstedt 469
Optimal solutions for stochastic inventory models when the lead-time demand distribution is partially specified
H. Shore 477
End-of-life service
R.H. Teunter and L. Fortuin 487
A simulation framework for forecasting uncertain lumpy demand
E. Bartezzaghi, R. Verganti and G. Zotteri 499
Deteriorating inventory model with quantity discount, pricing and partial backordering
H.-M. Wee 511
Models for warehouse management: Classification and examples
J.P. van den Berg and W.H.M. Zijm 519
The EOQ with backlogging derived without derivatives
R.W. Grubbström and A. Erdem 529
Diary of Events 531
